

Amendments to the Claims

Please amend the claims as follows (the changes are shown with ~~striketrough~~ for deleted matter and underlining for added matter). A complete listing of the claims is set out below with proper claim identifiers.

1. (Original) A polymer composition comprising:
(A) a polymer containing chlorine atoms, the polymer being produced by polymerizing cationically polymerizable monomers with an initiator in the presence of a Lewis acid catalyst; and
(B) a double salt containing magnesium and aluminum as metal atoms.
2. (Original) The polymer composition according to Claim 1, wherein the polymer is an isobutylene block copolymer including a block which does not contain isobutylene as a principal component and a block which contains isobutylene as a principal component.
3. (Currently Amended) The polymer composition according to ~~either Claim 1 or 2~~Claim 1, wherein the double salt containing magnesium and aluminum as metal atoms is a double salt of a hydroxide and a carbonate.
4. (Original) The polymer composition according to Claim 3, wherein the double salt containing magnesium and aluminum as metal atoms is a hydrotalcite.
5. (New) The polymer composition according to Claim 2, wherein the double salt containing magnesium and aluminum as metal atoms is a double salt of a hydroxide and a carbonate.
6. (New) The polymer composition according to Claim 5, wherein the double salt containing magnesium and aluminum as metal atoms is a hydrotalcite.
